THE COTTAGERS (Osada)

Townpeople go to the cottage. They go there to be cool. They'll be cool, even if they have to kill themselves for it... A comedy series where diverse characters meet: a millionaire who hides his properties to stay popular, a writer of the Red Library novels, an impractical hacksaw that also chops wood according to instructions on the Internet, a special forces reservist who actually works as a hairdresser at his wife's salon. Immutable rules apply in the cottage area. Although the world has changed in the meantime. This is what it looks like in the cottage area from Friday to Sunday. In the end, everyone comes back to the most important thing: the cottage is the best.
